

BENZO WITHDRAWAL SYMPTOMS

***NOT RECOMMENDED BY DOCTORS NOR
PHYSICIANS TO QUIT BENZOS COLD-TURKEY**

DRUG CRAVINGS

Feeling the urge and cravings to take another pill again, despite trying to quit in the first place.

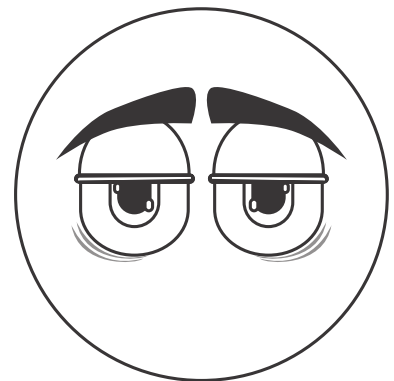

ANXIEITY

The most common reasons Doctors prescribed their patients with benzo to treat anxiety, but over time thier anxeity will comeback tenfold.

INSOMNIA

Another sample f irony is when benzo is supposed to treat insomnia, but quitting the drug will also cause insomnia

POSSIBLE SEIZURES

When your addicted and/or dependent with benzo. Your body and mind has changed and became used to the intake of benzo intake. When you quit cold-turkey, it is possible you can have seizures.

SUICIDAL THOUGHTS

The suffering and hardship can be too much for the person to handle, they don't even wish it, but for some reason a suicidal; though pops into thier head.

POSSIBLE DEATH

The top reason why Doctors don't recommend quitting benzos cold-turkey, you may not know your leading to your possible death.
